The Legislative Council proceedings for the past few days have possessed more than usual interestseveral matters vitally effecting the country having come before the body for discussion or final disposal. Among the most important measures of the session was the Supreme Courts Bill. This measure, which origina'ly provided for the maintenance of the present cumbersome, expensive and anomalous system of the administration of justice, came before the Council heralded by the prestige and weight of Imperial sanction; and it was feared at first that the members were prepared to accept it as brought before them and outvote the popular members in an attempt at amendment. This was open to amendment, and added

fear, we are glad to say, has proved groundless. The Acting Colonial Secretary announced that the bill that even he was prepared to support it with amondments Since this can sion, the omeral members have assisted to alter the principle of the bill unremorselessly, and notwithstanding the plaintive appeals of the poor Attorney General (who seems ever doomed to see his bantlings dissected before his very eyes) in behalf of two Judges and two separate staffs of Court officials, the measure as it passed the Council provides for one Chief Justice and one pusine Judge, with concurrent jurisdiction. The bill will now be satisfactory-highly so to the public, who have been the only losers by the miserable system now in vogue, and who have attentively watched the passage of the bill through its various stages. Apropos of the Attorney Genr eral, we are reminded of one of his extraordinary remarks the other day. Speaking to some measure then before the Council, he deprecated action because the country was in a "transition state !" Mr. Crease ought to blush (if he ever did blush) to stand up in the presence of the whole country and make an admission which stamps him either as incompetent or neglectful of his duty. When reproached for employing other gentlemen to prosecute before the Island Courts, the plea was that he "was overworked in assimilating the laws of the two sections." For fifteen months the unfortunate gentleman cudgels his brains and those of his clerk in bringing order out of chaos, and then stands up and complains that " things are still in a state of transition." His Excellency's reply to a resolution requesting copies of the correspondence, &c., connected with the Dry Dock, is, to say the very least, trifling His Excellency "regrets" that it will be "inconvenient" to furnish copies of the correspondence between the Admiral, the Governor, and the Imperial Government. Why? Surely the "inconvenience" is not found in a lack of clerical help. The Estimates show a large surplus of ablebodied governmental attaches, for whom (in another message) the Governor expresses much sympathy and declines to reduce them to pover y and dismissal unhealthy young men are to be foisted forever on the country because the Governor fears they will be unable to earn their bread His Excellency certainly entertains a very poor opinion of their efficiency or capacity to earn a livelihood at any honest calling. To carry the principle a little further, the Governor is bound to furnish support for all the unemployed men, as well as feed all the poor families in the country. If superfluous officials are to be continued in office at the putlic expense because, if turned off, they may have to undergo the same privations that hundreds of those who now contribute to their support have undergone, then we want to see the items classed under one head as "an appropriation for a poor-house" -for this is just what the reply of the Governor amounts to. But to return to the Dry Dock : We are sorry, for His Excellency' sake, that the copies asked for were not furnished, because their production might have dispelled the idea which has obtained credence here that His Excellency has not seconded Admiral Hastings' effort and recommendation for the location of the Dock at Esquimalt. The plea of "inconvenience" has but one meaning, viz., that the matter has not been pressed upon the notice of the Home Government with that zeal, vigor and ability which His Excellency has shown be is capable of exerting on certain occasions and under certain circumstances. If we judge His Excellency too harshly he has himself to blame.

Wood. To judge of the future by the past, there is as good a chance of obtaining the large raum as the lesser. We observe, too, that several items have been increased at the suggestion of popular members—the official element acquiescing in the increase with s sweetness of disposition which augurs that the Government intends to pay as much attention to the wishes of the Council as it generally does to those of the public. The Council may propose but the Government will dispose, when there are funds in the

LEGISLATIVE COUNCIL.

TuesDAY, April 28th, 1868.

Mossage No. 17 read—The Governor duly received the resolution of the Legislative Council, agreeing that an address be presented to him praying that he will inform the Council of the reply of Her Majesty's Government to a resolution passed on the 2nd April, 1867, recommending that the salary of the Governor be paid from the Imperial lunds, and that the Executive have power to simplify, centralize and reduce the depart-

simplify, centralize and reduce the depart-mental system, so as to lessen the public expenditure to such a figure as the Colony is able to bear. As regards the first point, he would state that he believes the condition of the finances of the Colony generally is engaging the attention of the Secretary of State. As regards to the second point he has to remark that very considerable powers for effecting retrenchment are confided to the Governor. A Telegraphic Novelty.

Messrs. S B Sterns and J G Smith, of the Franklin Telegraph Company, have been for some time engaged in perfecting an apparatus for working in both directions over a single wire at the same time. The method employed is the one originally devised in 1854 by Frischen, inspector of Telegraphs in Hanover, Germany, but has been improved by the addition of a local circuit attachment to the transmitting apparatus. A wire between this city and Boston has been worked in this manner during the past week with the greatest success.

THE FEELING IN ENGLAND.

THE GLORIOUS NEWS FROM ABYS-SINIA ?

London, April 27-Advices from Sydney Australia, say Farrell who attempted to mur-der Prince Alfred has been tried, found guilty and sentenced to death.

Great joy pervades the whole Kingdom over the news from Abyssinia, and the escape of Prince Alfred. To-day is observed as an

impromptu boliday. London, April 28—Both Houses of Par-liament to-night, without a dissenting voice, voted an address to the Queen on the subject of the attempted assassination of Prince Alfred, expressing sympathy of the British nation with the Royal family in the untoward event which has filled them with sorrow and the country with horror, and hoping that the Prince will soon be restored to health.

In the House of Commons Disraeli spoke in flattering terms of the achievement of Gen Napier and the army, and all who gave aid to the expedition for the conquest of Abys-He said the victory was only equal led by that of Mexico, by Cortez.

The trial of the Clerkenwell prisoners was continued. Barrett was found guilty. All the others were acquitted.

The first of Gladstone's resolutions on th

of the most prominent memoers took part. The case of Barrey, connected with the plot at Buckingham Palace, came up for preliminary examination. The so-called Greek fire proved to be phosphorus only, against the prisoners is strong. They are remanded for trial.

A very distinct shock of an earthquake was felt in Honolulu on Thursday afternoon, at two minutes before 4 o'clock. It continued for at least 30 seconds, with an irregular and tremulous motion. Some idea of the severity of the shock may be gathered from the fact that Mr. Fitters's autronomical citics, was that Mr Fitner's astronomical circk was stopped by it at just six minutes before four o'clock. The clocks in the Back, Postoffice and 3 others—six in all—were also lound to have stopped at the same instant.

The great mountain of Mauna Loa has again commenced to display its wonderful volcanic fires. On Thursday night, from Ka-waitne, was seen the first glimmer of light from the new opening on the incuntain side which soon lit up the beavens and indicated that a new lava flow had begun. The crater seems to be near that of 1859, and the lave flows in a northwesterly direction towards

MARRIED WOMEN AND MAIDS. -The Imperial Review is troubled with the question whether married women should dance, and it expresses its opinions in a long article, from which we make an extract. It says: "There is something almost unseemly in the spectacle of a ball dozen-young married women walking off with some of the best putters in the room, while a row of girls are sitting neglected against the wall. Neither ignorance nor thoughtlessness can be laced in excuse. Women thoroughly know women, whatever else they know; and there is not one of them that is not vividly conscious of what heart-burning it validity conscious of wait nearconing it causes to poor girls to hear the music and watch the many twirling feet of a ball-room, and play the almost ignominious part of passive spectators. Grown up women clatching at all the toys or sweetmeats of a Christmas tree at a juvenile party, would not be a more unnatural speciacle. Grown up men eager to win the stake at a round game would not be more cities of manuals.

would not be not constrained to plead for tenderness and consideration ou the part of the young women who are married toward young women who are not. Might not Sydney's words as he handed the draught of water to the dying soldier at Luizen, be profitably remembered? bered? 'Thy need is greater than mine.'

THEATRE ROYAL .- The audience last night to witness the repetition of Fanchon, if not as large as on the first occasion, was still good and highly appreciative; and considering that our community is not, strictly speaking, large enough to support repetitions, Miss Stone we think may be satisfied with the attendance. The cast of characters was not changed, and the acting admirable throughout. Indeed, to us, it appeared a little better than the first night in many scenes. There was a calm and subdued power, which in some of the passages were truly affecting; and after all, Mis Stone, like many on the stage and off, is perhaps the most powerful when she least tries to be so. The audience fully recognized this, and applauded all in turn. At the conclusion Miss Stone was called as usual before the curtain.

KOOTENAY MINES .- The Walla Walla Statesman has news from Wild Horse Creek to April 1st. The winter had been mild and spring weather had already commenced. The big ditch would be ready for service on April 8th. Large amounts of gold were being taken out. Hydraulics have been introduced and work to advantage. On Boulder Creek new diggings have been discovered, and it was thought that this creek would prove very rich. Large numbers of men were going into the mines. Miners and others there at present are represented as doing well, and express themselves satisfied with the future prospects of that country.

ODD FELLOWS' CELEBRATION -This excellent Order gave a splendid dinner and ball atthe Germania rooms Tuesday evening. Some sixty members with their friends sat down to dinner, which passed off in the most harmonious manner. Several able speeches were delivered, full of cheering good-fellowship and liberal and patriolic sentiments. The ball was all that could be desired. With good music and abundance of ladies, the dancing was continued till a late hour in the morning. The "victualling department' was admirably superintended by Astrico.

THE CAPTAIN, now building at Messrs. Laird's yard at Birkenhead, from designs by Captain Coles, R N., C B., will be an honest specimen of the gallant officer's turretship. She will be large and commodious, and as the Lords of the Admiralty have in no way interered in the manner of her construction, all merits and all faults (if any of the latter should unfortunately exist) will be. Captain Cole's and not their Lordships'. The Captain is only to berth 400 menrather a small number for a ship of 4.272 tons, and 900 horse-power.

POLICE COURT .- For some time past this court has been e-pecially free from cases of any interest to the public. Yesterday, hows ever, a man named Dillon, having a good character for industry, was charged with an unprovoked assault upon some Indians, and fined \$10, or in default of payment, fourteen days imprisonment. The prisoner himself had evidently been through the mill on a drunken spree, and presented a most dilapidated appearance.

ROAD TRAFFIC .- Several teams and trains for up-country started out last week : Geo. Lyal, with team for Lytton, on Tuesday Pierce Sherman, with team for Soda Creek, on Wednesday; M Gauchon, with toam for Cache Creek, on Wednesday; Tompkins for Cariboo, on Thursday, with 20 packs; Arthur McLinden, with wagon, for Lytton; P L Anderson, ox team, and Beedy's team Burke, driver, for Soda Creek and Cariboo, on Saturday .- Examiner, Yale.

THE manufacturers of meerschaum pipes in Germany, in giving directions for coloring the pipes, say the bowl should not be touched by the hand while warm. As a general thing, it is better not to smoke a new bowl to the bottom. The color is surer to be fine when not produced too rapidly, but the main thing is that the meerschaum should cool without being touched. This is the only use of smoking with the bowl in a

case; exposure to the air does no injury.

THE explosion of coal oil lamps is caused A Most Strange Chapter Explained by neglecting to cut off the charred portion of the wick when the lamp is filled. Observation will show that in a few days' use the wick becomes like charcoal in composition for an inch below the top of the tube containing it, and after the lamp has burned a short time the heated tube fires all of the charred portion of the wick inside, and that sats the oil on fire below.

The Cape of Good Hope.

The mortality rate at Cape Town from fever still continued very high. Exertions were being made to suppress the disease. The harvest had proved a dounteous one, though less favours ble than was anticipated. From a return just published marked improvement was shown in the colonial finances and Gova ernment revenue, and the extent and prospects of general trade were more favour-able than for years before. Hopes were entertained of a surplus revenue in the treasury at the close of the present year. It had been revolved to delay the open-ing of the docks in Table Bay, in order to excavate eight acres of the inner dock to a uniform depth of 25 feet of water. More coal-fields had been found in Port | Francisco. Natal, and the prospects were still fur-ther brightening. Gold quartz and nuggets had also been discovered in the Transvaal country, and a large party was in course of organisation to explore the neighbourhood.

The Cape Town Theatre has been

totally destroyed by fire. and be advantaged At Natal, judgment had been declared in the suit of Bishop Colenso against Dean Green. The Supreme Court has set aside the judgment of the Privy Council, and declares that Natal was a Crown co'ony when the plaintiff's patent was issued; that Dr. Colenso is, therefore, trustee of the buildings and has ecclesiastical jurisdiction. The judgment further ejects Dean Green from the deanery, and prohibits him from officiating in any of Dr. Colenso's churches. The friends of the Dean have since held a meeting, at which it was resolved not to appeal against the judgment, but to erect or hire temporary churches, and that Dean Green should at once proceed

to England. The announcement of the discovery of gold-fields in the Transvaall is principally founded on the report of a German mineralogist, Herr Mauch, who has been exploring the country. He writes, under date Potchefstroom, Dec. 2, 1867:—
"Just returned from a second trip in Moselikatse's country. I give you short notice that I have been very successful in finding gold, not in small, scarcely visible specks, but in great veins of quartz in the videst gold-fields, one of them more than

Mrs Clinton, Post Mistress at Broadhead, Wisconsin, has written the following to the Cincinnati Com-

Having noticed in the Commercial of the 12th inst., a highly incredible story copied from the La Cross (Wis.) Democrat, pertaining to a person whose sex, it was claimed, was changed at the age of puberty from that of the female to the male gender, my curisity to know what truth there might be in so strange a story led me to address the Post master of the town where this remarkable freak of nature is said to have occurred, for infor-mation upon the subject. The following response from Post Mistress of the town of Broadhead, although not scientifically explaining the question of sex' pertaining to the individual under discussion, is sufficiently suggestive to enable one to draw tolerably correct conclusion therefrom

Mr Burnham, so-called, was probably a hermaphrodite (belonging to neither sex) and was assigned by the paents to the female department of the family; but upon attaining the age of maturity, the change of the femicine voice and the growing of a 'crop of whiskers,' indicated a predominance of the male gender, whereupon Mrs Powell donned male attire, and changed her relations from that of a wife to a husband, socalled.

The story of said individual having been first a mother and then a father, it will be seen by the accompanying note of the Post Mistress, is without foundation, as was to have been expected:

BROADHEAD, Wis., January 1, 1868.

She lived two or three years in that relation; then changed her clothing, lived single a year or two, then married a lady of my acquaintance. I understand they live happily together. The endeavor to introduce horse flesh into Eenglish diet brings out some good jukes. Judy represents a gentleman at dinner ladeling up a horse-shoe from the soup tureen and saying: "Pon my soul, it's too had. This is the second time the cook's forgotton to take the shees off."
